

22nd May 2026

Forecast

NIFTY / SENSEX

Nifty, continued to remain rangebound, opening near the 23800 zone and fizzling out as the day progressed to end on a flat note near the 23650 level with the bias and sentiment maintained with a cautious approach as mentioned earlier. Technically, the index would have the near-term support at the 23200 zone, which needs to be sustained to maintain the overall bias intact, whereas on the upside, the 24300 band shall be the tough resistance hurdle, which needs to be breached decisively. **Sensex** has been in consolidation, hovering in the range of the 74000–76000 level since the last 7 sessions, with bias overall maintained with a positive approach. A decisive breach above the 76100 zone shall establish conviction and trigger a further rise to the initial target of the 50EMA level of 79800. On the downside, the major and crucial support would be maintained near the 74000 zone, which needs to be sustained to maintain the overall trend intact. The support for the day is seen at 23400 levels, while the resistance is seen at 23800 levels.

BANKNIFTY / BANKEX

BankNifty, opened in the green near the 54000 zone but slipped down, erasing the gains as the day progressed ahead to end near the 53450 level with bias still precariously placed, having the near-term support at the 52800 zone, and a decisive move below shall further weaken the trend, opening the gates for downward movement and triggering fresh targets of 51800 and the 50000 levels. On the upside, a decisive move past the 54500 level is much needed to improve the bias to some extent. **Bankex** opened on a positive note near the 61000 level, where it found resistance, and with profit booking, slipped down to close near the 60200 zone, with bias maintained with a cautious approach, and would need to breach above the 61000 zone decisively to establish conviction in the coming days. As mentioned earlier, on the downside, the index would need to sustain the 59500 level, which is positioned as the important support zone to maintain the bias intact. BankNifty would have the daily range of 52800-54400 levels.
